**EMERGENCY
ALERT PENDANT**

Uniden®

Peace of Mind & Emergency Help is only a button press away

The Uniden Emergency Alert Pendant is the new simple way to obtain help in an emergency situation, while still enjoying independent living. With the simple touch of a button, help can be on the way. Uniden's Emergency Alert Pendant is small and compact enough to be your emergency assistance companion 24 hours a day.

SPLASHPROOF**
PENDANT

THE PENDANT IS:

- Lightweight, portable and even splash proof**
- Can be worn on the wrist, over the neck or placed in a convenient location
- Can be used in the house, in the garden or in the garage

** Certified to meet the world standard JIS4 splash proof level. Being defined as having no harmful influence by receiving a splash of water from any direction.

Uniden®

SO EASY TO USE

Simply push the Help button and the Emergency Alert Pendant will start calling the people of your choice and advising that assistance is needed.

Ideal for

- The elderly
- People with visual or hearing impairment
- Anyone with mobility difficulties
- Tradespeople or anyone working alone

So many Applications

- Households
- Apartments
- Living Alone
- Retirement villages
- Nursing Homes
- Convalescing Patients
- Physically impaired people
- Workshops
- Business premises

HOW DOES IT WORK

Once the Help button is pressed the Emergency Alert Pendant will:

- A** First call the internal home phone system intercom so that someone in the house may be notified that help is required, and;
- B** Secondly, if unanswered, the Emergency Alert Pendant will automatically call up to 5 different phone numbers of your choice, whether they are mobile or fixed line numbers. It will call one at a time and if unanswered, the Pendant will automatically call the next pre-programmed phone number.

Once the call has been answered, the recipient is advised to press the hash (#) key to acknowledge the call. If this is not pushed the Pendant calls the next pre-programmed number. Therefore the Pendant is able to detect a live call response versus an answering machine for greater safety.

Once your call is accepted and answered by the other party you can enjoy the peace of mind of being able to directly have a two way conversation with that person through the Pendant and via its built-in speakerphone.

Multiple Emergency Alert Pendants

Multiple Pendants can even be added to your system so that you can have a Pendant in the bathroom, bedroom, living room or for each person in the home. And being so lightweight and portable enables you to easily have it with you all the time, even in the garden, for your safety and convenience.

Use the Pendant as often as you like with no monthly usage fees. The Pendant and phone system simply connect to your existing telephone line.

NO Installation Fees
Monthly Fees
Monitoring Fees

Uniden®

An Integrated Solution

The Emergency Alert Pendant is required to operate with one of Uniden's SSE Range of cordless phones. Therefore the user can enjoy the convenience of a Pendant and Cordless Telephone or the Pendant and a traditional Corded Phone.

The SSE range of phones also have a range of special advanced features to compliment the Pendant including:

- Large Easy to See Buttons
- Large Display Screens
- Extra Loud Audio assistance controls
- Visual ring indicators
- Integrated Answering Machine with Slow Playback Function
- Hearing aid compatibility

Unique Benefits. Trusted reliability and performance

Only Uniden offers an Emergency Alert Pendant system that:

- Is supported by the trusted reliability and performance of Uniden – the No. 1 selling brand of phone systems in Australia and New Zealand for the past 10 years.
- Is so simple to use: simply push the Help button. The Pendant is always ready to use. There is no need to find an on/off switch before you can activate the pendant. The Pendant will even automatically dial the next pre-recorded phone number – there is no need for you to worry about dialling each number individually.
- Has the longest talking range of an emergency pendant due to the advanced XDECT digital technology.

- Integrates with Uniden's range of SSE cordless and corded telephone systems. Enjoy big buttons, large display screens, extra loud audio assistance, visual ring indicator and even slow playback of answering machine messages. Plus the Pendant is hearing aid compatible (T-Coil).
- Splash proof** – Ideal for wet areas such as bathrooms, laundries and kitchens.
- No on-going expensive monitoring fees.
- Has clear and concise two way communication.
- Has a Glow in the Dark Help Button feature.

Medical Note:

If you have a personal medical device such as a pacemaker or hearing aid, please consult with the manufacturer of this device to determine if it is adequately shielded from external RF (radio frequency) energy. This telephone product operates in the frequency range of 1.88 GHz to 1.90 GHz and has a maximum output power level of 0.25 watts.
