Some jurisdictions and authorities may regulate the use of surveillance products. It is the buyers responsibility to ensure they comply with the appropriate regulations when using this product. Specifications Subject to Change Without Notice. See Uniden Website for any changes: uniden.com.au \* IP66 Weatherproof is defined as no ingress of dust, complete protection against contact (dust tight) and strong water jets or waves projected against the enclosure of the camera from any direction shall have no harmful effects. **Minimum Network Bandwidth Requirements:** For optimal performance of the smartphone app we advise a minimum network bandwidth of 4Mbps for Full HD (1080P) live stream, 2Mbps for HD (720P) live stream and 0.8Mbps for 352P live stream. If these bandwidth requirements are not met the live stream may not connect and will not be viewable on your smartphone. **Motion Detection:** Motion detection can be triggered by the PIR sensor in the camera. The PIR sensor only detects objects with heat up to 8 metres away and in the line of sight. At night, or in darkness, monitor motion detection sensitivity is not as effective as in daylight hours, as it relies on night vision capabilities.
