SPOKEN STREET NAMES

UP TO 265,000#

The New Uniden TRAX 320 combines the latest in GPS technology and software. Designed by Uniden's experienced team of engineers. Like never before on a portable GPS navigation system while driving along a road it is now possible to see road elevations and land contours including road overpasses and bridges on the Uniden TRAX series.

Designed and engineered exclusively by Uniden, the TRAX Series include Text to Speech with Spoken Street Names, which enhances audible directions and makes finding a location even simpler. With an over speed alert makes the TRAX 325 a great safety tool to have as your companion in the car.

The screen is super bright, removing glare for crystal clear viewing. It also switches automatically to night mode for easy, glare-free viewing after dark. For drivers who travel to more than one location in a day, multipoint route planning allows for multiple destinations to be programmed in advance. This allows drivers to go from one map to the next, taking the fastest and most direct route. Predictive keyboard text also reduces the destination search time and if drivers make a wrong turn in a pre-programmed destination, the system will recalculate directions immediately.

When it comes to portable GPS car navigation systems the Uniden TRAX series is in a class of its own. It makes your trips safer and faster while giving you peace of mind that you will reach your destination on time, every time.

Suggested Retail: \$249.95
