## 2.5K INDOOR PAN & TILT SMART CAMERA

**2.5K (5MP):** Super HD See your home in finest detail. Much clearer than a 1080p camera.

**EASY SETUP:** Plug it in Connect to WiFi. And you're good to go.

**355° PAN & 50° TILT:** Rotate the camera to get a full view of your house.

**DUAL-BAND WIFI:** 2.4/5 GHz WiFi for simple installation and reliable network performance.

**TWO-WAY AUDIO:** Have real-time conversation with families remotely anytime.

**SD CARD & CLOUD BACKUP:** Micro SD card (not included) for local storage and cloud backup for offsite storage. 7 Days of Cloud Storage is offered with longer paid plans available. Night Vision See every move of your baby or pet clearly in low light.

**PRE-MOTION RECORDING:** Start recording 4 seconds before motion is detected. See the whole event from beginning to end.

**PRIVACY MASKING:** Black out areas within the camera's view that you don't want to be recorded.

**NIGHT VISION:** Ability to see the footage in low light.

**SMART INTELLIGENT ALERTS:** Get Instant app push notifications, email and siren alerts.

**MOTION DETECTION RECORD:** Save motion events on micro SD card (not included) or on Uniden Cloud for later playback.

**SIREN ALERT TRIGGER:** a siren is built into the camera to deter unwanted visitors.

Some jurisdictions and authorities may regulate the use of surveillance products. It is the buyers responsibility to ensure they comply with the appropriate regulations when using this product. Specifications Subject to Change Without Notice. See Uniden Website for any changes. uniden.com.au # WiFi range (Distance) is all dependent on your router's capability, which will affect your network coverage. If you need to extend your network coverage many third party range extenders are available that improve distance and eliminate black spots. Range Performance is affected by factors such as: full brick walls, tin roofs & large or multi-story houses. \* Both smartphone/tablet and the camera will require internet connection for this feature to work. † Minimum Network Bandwidth Requirements: For optimal performance of the smartphone app we advise a minimum network bandwidth of 4Mbps for Full HD (1080P) live stream, 2Mbps for HD (720P) live stream and 0.8Mbps for 352P live stream. If these bandwidth requirements are not met the live stream may not connect and will not be viewable on your smartphone. ‡ Subscription needs to be renewed every month.
