## KEY RANGE FEATURES

**DUAL CAMERAS**

Reverse/Rear Camera to record all the action on the road, behind and in front at the optimum clarity.†

**SPEED CAMERA WARNINGS**

Alerts you while driving of upcoming fixed speed cameras and red light cameras.

**ADVANCED DRIVER ASSISTANCE SYSTEM**

ADAS, including Forward Collision Warning.\*

**LANE DEPARTURE WARNING^**

A visual and audible alarm will alert you when your vehicle is drifting over a lane.

**HEADLIGHT LOW LUX WARNING**

Sensors detect low external lighting conditions, alerting you to turn on the headlights.

**GEOTAG VIDEOS**

GPS antenna inside the mount enables video geotagging, recording direction travelling, location and speed.

**3 AXIS G-SENSOR**

Measure and capture G-Force impact in 3 dimensions.

**PARKING MODE**

Gives you peace of mind when your car is parked and the engine is switched off – the inbuilt sensor detects sudden vibration, triggering footage recording.\*

**UP TO ULTRA WIDE ANGLE VIEW 150°**

Shows greater angle to capture more of the action around the vehicle.

**LARGE SPEEDO DISPLAY**

For easy, quick speed identification. Minimises driver distraction.

**SUPERCAPACITOR**

The iGO CAM 85R is powered by a Supercapacitor, providing a longer lifespan and wider range of operating temperatures than traditional lithium-ion batteries, making it better suited to harsh Australian conditions. It also provides enough backup power to ensure any recording in progress is stored safely before shutting the camera off.

## OTHER CONVENIENT FEATURES

- Small & Compact Design
- Plug & Play – quick & easy to set up
- Event Recording Mode
- Loop Recording Mode
- Photo Mode
- Auto Power Off
- Date & Time
- Brightness Control
- Records Footage onto Micro SD Card (Not Included)
- Maximum capacity: 128GB for iGO CAM 60, 70R & 85R, 64GB for iGO CAM 80 & 32GB for iGO CAM 50R/40/30†
- Cigarette Charger Included
- 2 Sticker Mounts – Rotating Design for Optimal Visibility & Stability

## KEEP YOUR DASH CAM ON WHEN AWAY FROM THE VEHICLE

OPTIONAL ACCESSORIES (Not included)

## UPP80S Portable Solar Powerbank

ALSO IDEAL FOR CHARGING SMARTPHONES & TABLETS

- Water-Resistant†
- Dust Proof
- Compass
- 2 LED Flashlight

The Portable Solar Powerbank gives a temporary charge and keeps your Dash Cam active for recording. Recording will vary, depending on the level of charge left in the Portable Solar Powerbank batteries.

**UNIDEN.COM.AU**

\*Parking mode or Impact/Movement detection works only with the G Sensor mode turned and an optional Hard Wire Kit installed so when the car and the unit has been powered off, this will turn on the unit if it detects vibration. ^The Lane Departure feature requires correct calibration to capture road markings. Lane Assist is ideal for driving on main highways with good road markings. Lane Departure will be limited in poor visibility or where there are inconsistent or faded road markings. #For this to work ADAS Detect option must be turned on and it also requires correct calibration. This feature is designed and best suited to open road driving such as a motorway. 128GB (iGO CAM 60/70R), 64GB (iGO CAM 80), 32GB (iGO CAM 50R/40/30) is the maximum Micro SD Capacity. Class 10 minimum speed for recording. Recommended to use MLC/SLC Micro SD Card. (iGO CAM85R) 128GB is the maximum capacity Micro SD Card. Uniden recommends using UHS-II cards with UHS Speed Class rating with minimum class U3 for minimum write performance of 30 MB/s. † Image on packaging is for illustration purposes only. Captured footage is dependent on the position and location of the vehicle dash cam & rear/reverse camera. iGO CAM 70R the single camera recording utilises the front dash cam camera only. In this mode it will record at 2.7k (1524p) resolution. If dual camera recording mode is selected then both front dash cam camera & rear/reverse camera will record at Full HD (1080p) resolution. ‡ Reverse Camera – IP66 is defined as no ingress of dust; complete protection against contact (dust tight) and Water projected in powerful jets (12.5 mm nozzle) against the enclosure from any direction shall have no harmful effects. UPP80S – IP54 being, limited protection against dust ingress, (no harmful deposit). Protected against splash water from any direction. UPP1000 – IP67 is defined as protected from immersion in water with a depth of up to 1 meter (or 3.3 feet) for up to 30 mins and dust-tight being no ingress of dust. Only applies when not in use and rubber seal attached & totally sealed. \*Vehicles with 12V battery. Apple and the Apple logo are trademarks of Apple Inc., registered in the U.S. and other countries.
